ch-2 sp chain 2 space(s): number denotes number of chains in chain space

Pattern notes

- Ch1 in the beginning of a row does not count as stitch
- Ch2 in the beginning of every row does always count as stitch (first dc). I am well aware that it is more common with a ch3 as the first dc in a row. But I think a ch2 gives the scarf a neater look. If it doesn't work for you just make a ch3 instead.
- The dc4tog is "splitted". First and second dc of the first dc4tog are crocheted in first ch2sp, fourth and third dc of the first dc4tog are crocheted in second ch2sp.
- All others dc4tog are crocheted like this: first and second dc of the dc4tog are crocheted in same ch2space as third and fourth dc of the last dc4tog. Third and fourth dc of the dc4tog are crocheted in the next ch2sp.
